

Multimedia Projects in Education: Designing, Producing, and Assessing, 3rd Edition

Building on the materials in the two previous successful editions, *Multimedia Projects in Education, Third Edition* features approximately 40% all new material and updates the previous information. The authors use the DDD-E model (Decide, Design, Develop, Evaluate) to show how to select and plan multimedia projects, use presentation and development tools, manage graphics, audio, and digital video, create Web pages, and evaluate student work. Project suggestions come complete with scenario, an overview, topics, and reproducible worksheets, and can be easily adapted for different grade levels. Helpful assessment rubrics are included for projects. Teachers and library media specialists will enjoy this hands-on practical approach to implementing multimedia into their everyday classroom practice.
