

Leftover Women: The Resurgence of Gender Inequality in China (Asian Arguments)

In the early years of the Peoples Republic of China, the Communist Party sought to transform gender relations, but those gains have been steadily eroded in recent decades during Chinas transition to a post-socialist era. In fact, women in China have experienced a dramatic rollback of rights and gains relative to men. In *Leftover Women*, Leta Hong Fincher exposes shocking levels of structural discrimination against women and highlights the broader damage this has caused to Chinas economy, politics, and development. Drawing on cutting-edge data from a Sina Weibo survey of some three hundred men and women as well as in-depth interviews with both men and women in China over several years, *Leftover Women* debunks several major myths about the status of women in Chinas post-socialist period. This second edition of the critically acclaimed book *Leftover Women* offers a unique, inside view of urban, professional women in Chinas emerging middle class and provides an insightful analysis of Chinese society today.
